

I am not in support of NAB's petition 04-160. Satellite radio (SR) is a service that I elect to pay for. SR should not be prevented from servicing its customer in the manner that they deem meaningful. The NAB does not have my interest as a listener in mind. Perhaps if their product was of the same high quality that SR's is, they would not have to seek protection from the FCC.

Reject 04-160
